With today’s technologies at hand, treating Vertical discrepancy in orthodontics should not be as challenging as it used to be and ending the treatment with a great smile should be a given.

In this on-line course we will discuss varied treatment options for wide range of cases. Whether it is reduced incisal show, a gummy smile with true VME, a simple deep bite or sever open bite. Any case on this spectrum can be treated without resorting to invasive procedures.

We will also discuss how to apply the components of beauty in treatment planning especially when dealing with occlusal canting and facial asymmetry in adults.

Module 2:
Duration: 2 - 3 Hours
Date: 11 April
Dr. Borgan received his dental degree from the University of Jordan in 1994, which was shortly followed by a master of orthodontics from Cairo university and a fellowship from the Royal College of Surgeons in UK.

In addition to his orthodontic practice in JORDAN, Dr. Borgan moved with his family in 2015 to Cambridge - UK, where he founded his Academy.

Dr. Borgan is a key opinion leader in the region of EMEAI (Europe, Middle East, Africa & India) for Ormco. He is part of the R&D team for Insignia, where recently Insignia has applied his modification in the design of the system.

Dr. Borgan loves to share his passion towards creating beautiful smiles and faces, he believes that using the most advanced technology in diagnosis and treatment can produce beautiful smiles without removing teeth or major surgeries.

Dr. Borgan carries various workshops and lectures worldwide in the field of self-ligation and digital orthodontics, and for more than 8 years, he has been trying different ways and protocols for treatments with Damon & Insignia, until he created his own philosophy using both systems. and today he will be sharing with you some of his personal terms: Borgano-dontics, Maxillo-dontics, Mid-face oriented treatment and Root oriented orthodontics.

Orthodontic Management of Occlusal Canting and Facial Asymmetry in Adults
- Facial maturation
- Triangle of symmetry
- Differential impaction / Non Surgical approach

Diagnosis & Orthodontic Management of Gummy Smile due to:
1- Short or Hyperactive upper Lip
