

## PARADE OF CHALLENGING MALOCCLUSIONS TREATED VIA VECTOR TAS MINISCREWS

PART II

Dr. Mohamed El Sayed

**GENERAL  
INFORMATION**

### **Abstract:**

Understanding and managing anchorage system is a cornerstone for efficient and effective orthodontic treatment. Miniscrews are the most friendly user anchorage system since last 15 years. They are under the umbrella of the temporary anchorage device (TAD). Different types of extreme challenging malocclusion were treated via Vector TAS miniscrews. Fortunately, we decided to split the seminar into two parts to share more cases, to gain more tips and tricks, to ease miniscrew biomechanics, to get confidence while you are using them.
